Washington, D.C. 20231

Paper No:07072005  
Application No:10/672553  
Filing Date: September 26,2003

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. It should be brief but technically accurate and descriptive, preferably from two to seven words. See 37 CFR 1.72(a).

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1,2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1,2 are single means claims.

See MPEP 2162.08(a)

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2837

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue (6318508).

Inoue teaches in figures 1-15, an elevating system which synchronizes plural elevating devices to prevent tilting as might occur in a jack, electric motor cylinder, hydraulic cylinder or the like.

Control apparatus 1 maintains the system from tilting based on detectors D1-D4 and actuators

A1-A4.

The control is provided in the downward direction as well.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Baker '461, '429 Green et al., Kishi '413,'110 are cited to illustrate similar elevating synchronizing systems..

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
